Appl. No. 09/972,966 Amendment dated June 5, 2006 Reply to Office Action of March 3, 2006 RECEIVED CENTRAL FAX CENTER JUN 0 5 2006

IN THE SPECIFICATION:

Please amend specification as follows.

Please delete paragraph [0102] and replace it with the following:

[0102] The second signal switch 535 and the TX data switch 547 determine the operation mode of the transceiver 500, either a UWB mode or a narrowband (NB) mode, and thus the source of the modulated waveform mentioned above. In a UWB mode, the second signal switch 535 is connected to the PFN 550 to select the use of a UWB signal, and the TX data switch 547 is connected to the PFN 525 550. In an NB mode, the second signal switch 535 is connected to the first divide circuit 540 to select the use of a relatively narrow band signal, and the TX data switch 547 is connected to the PFAC 525. Thus in a UWB mode the PFN 550 provides a modulated pulse stream to the second signal switch 535, and in an NB mode the first divide circuit 540 provides either an FM signal or a tone to the second signal switch 535.
